Concerning the agents of insurance, the broadest common elements appear to be the following: This model of stability is breaking down in Europe, north and south. Considered as a group, European health systems are evolving from variants of the command-and-control model adopted in the post-World War II years for reasons of social effectiveness toward more competitive structures.

Their salaries are not included in the national health accounts. This increase was primarily a result of changes in the percent of the population protected by a public plan. So how exactly can the Office save governments money? The reason given for the omission is that the social insurance program also administers two income-maintenance plans for sickness benefits and disability.

The views expressed in this article are not necessarily shared by the Institute for Health Economics. Expenditure on Health. One example is provided by Belgium, where the largest social insurance carrier enacted an even more stringent productivity drive than that in France.
