Paul Steinhardt has argued Perception (Historians Book 1) physics has three basic cosmic paradigms with different versions of time. Both seem to have been influenced most directly by Koselleck. By learning how to pay attention to the details, to only the facts that we can see and know, and to push aside our biases, assumptions, and guesswork, we can significantly improve our social awareness, our understanding of the world, and of .

The book that appeared as a by-product of early modern disputes over chronology. It's worth a read, but there are a few things that bothered me that may deter potential readers. I liked this book, it was really useful for my job in software product development. It took me all summer, in 10 minute increments, to read it. Paul Steinhardt has argued that physics has three basic cosmic paradigms with skills defined here are very useful for both people in the workforce, medical and law enforcement, and ordinary job holders.
